

FOREVER OURS

Advance Praise for FOREVER OURS

"Here is a doctor with a heart. Her book brings tears to my eyes and joy to my heart and that is what life is about. Though pathology is her specialty life is her teacher. Read and learn about life and the gifts of our mortality."

--Bernie Siegel, MD author, Love, Medicine & Miracles

"Dr. Amatuzio, often called 'the compassionate coroner,' is an exemplar for the compassionate practice of forensic medicine. Forever Ours has much to teach us about healing, loving, and the deep connections with our loved ones."

--Kathleen McMonigal, MD, Aerospace Medicine, Houston

"As a forensic pathologist, Dr. Janis Amatuzio looks death in the eye every day, and she has come away from this confrontation with a message of promise and hope. Her vision is a stark contrast to the dismal pronouncements of modern science that death is the end of everything. Forever Ours is the only book I know that finds buoyant, optimistic meaning in the morgue. It could be written only by a physician of uncommon vision, who, although she attends to dead bodies, is a healer."

--Larry Dossey, MD, author, Healing Beyond the Body

"Many thanks for publishing this book.... There are no words to describe the impact Forever Ours has had on me..."

--Leslie Lemons, Director of Marketing/Development, Free Arts of Arizona

"A deeply compassionate, extraordinarily sensitive, and objectively scientific exploration of the mystery of death. This book is a wonderful gift to care givers, patients, family members, and every person who has ever thought about our human mortality and the meaning of life---which means, of course, that it is a gift to us all."

-- Neale Donald Walsch, author, Conversations with God
