

FOREVER OURS

Lectures and Book Signings open to the public

As a celebrated speaker, Dr. Amatuzio has added this lecture to her national keynote topics.

Dr. Janis Amatuzio, known as the “compassionate coroner” speaks on the subject of immortality and living. She has learned a great deal about life from death. After each non-criminal autopsy Dr. Amatuzio conducts, she makes a personal phone call to every family of the deceased to share her findings. Through these thousands of calls, she has heard extremely personal accounts of visions and synchronicities surrounding those deaths. These true-life stories did not end up in the autopsy reports but rather in a file named “experiences” and ultimately found their way into her first book, FOREVER OURS. Because Dr. Amatuzio is a highly regarded scientist and an expert in forensic medicine, her message is compelling. She says, “I’m not telling you anything new. It’s really about remembering what we already know.” Dr. Amatuzio inspires audiences on a deep level and opens them to the possibilities of life after death and the gift of life itself.

BOOK SIGNINGS AND LECTURES OPEN TO PUBLIC

November 5, 2005

“Keynote: Immortal Patterns in the Rhythms of Life”

Edge Life Expo 2005

Minneapolis Convention Center

1301 Second Avenue South
