FOREVER OURS

Audio Book—Read by the Author
Real-Life Stories on Immortality and Living
from a Forensic Pathologist

“It is a stellar recording!”
—Georgia Hughes, Editor, New World Library

“A deeply compassionate, extraordinarily sensitive, and objectively scientific exploration of the mystery of death, this is a wonderful gift to caregivers, patients, family members, and every person who has ever thought about our human mortality and the meaning of life. This means, of course, that Forever Ours is a gift to us all.”
— Neale Donald Walsch, author of *Conversations with God*

“As a forensic pathologist, Dr. Janis Amatuzio looks death in the eye every day, and she has come away from this confrontation with a message of promise and hope.”
— Larry Dossey, MD, author of *Healing Beyond the Body*

A passionate storyteller, Dr. Amatuzio reads with great feeling. She weaves her own life experience among the real-life stories she has collected, creating intimacy with the listener as she brings forth the voices of those left behind. The compassionate coroner reminds us that love heals and is the eternal thread connecting us with those who are forever ours.
